POST-DEATH FINANCIAL ASSET DISCOVERY

India's Next Fintech Unicorn Opportunity

Solving the ■1.84 Lakh Crore Problem
Nobody is Addressing

THE OPPORTUNITY IN 30 SECONDS

When Indians die unexpectedly, their families face financial chaos. Accounts are scattered, passwords are

Business Case Prepared: March 2026

For: Business Stakeholders, Strategic Partners & Investors

THE PROBLEM: A ■1.84 LAKH CRORE CRISIS

Every day in India, breadwinners die unexpectedly. Their families are left not just grieving, but facing a financial nightmare that could last years. This isn't just emotional trauma—it's a massive systemic failure costing families and the economy billions.

BY THE NUMBERS: THE HIDDEN CRISIS

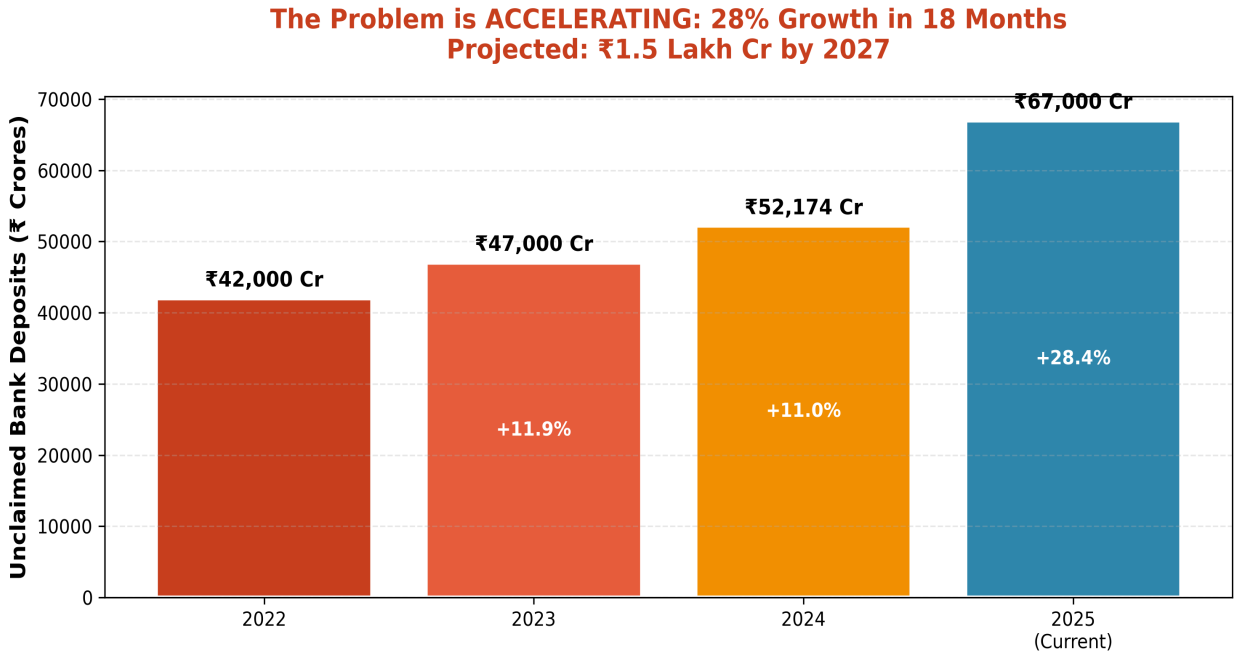
■1.84 Lakh Crore → Total unclaimed financial assets in India (as of Oct 2025)
28% Annual Gr

What Happens When Someone Dies Suddenly?

The typical Indian salaried person or business owner has:

- **5-10 bank accounts** across different banks (salary, savings, FDs)
- **3-8 investment accounts** (mutual funds, PPF, EPF, NPS, stocks)
- **2-5 insurance policies** (life, health, vehicle, home)
- **Digital accounts** (Paytm, PhonePe, cryptocurrency, online brokers)
- **Physical assets** (gold, property papers, locker keys)

The catastrophe: When they die, the family doesn't know 90% of this exists. Even when they suspect something exists, they can't access it.



The Problem is ACCELERATING: 28% Growth in 18 Months

Problem Severity Score (0-100)

WHY THIS PROBLEM EXISTS (AND IS GETTING WORSE)

Root Cause	Impact	Affects
Cultural Secrecy	Men typically don't share financial details with family members	70% of households
Financial Complexity	Middle class has 15-20+ financial relationships across institutions	150M+ households
Digital Shift	Paperless banking = no physical evidence, 2FA locks accounts	200M+ accounts
Scattered Systems	No central repository; every bank/fund/insurer is a separate silo	Entire market
No Planning Culture	Only 5% of Indians create wills or do estate planning	95% of population
Death Taboo	People avoid discussing death, delaying any preparation	Cultural norm

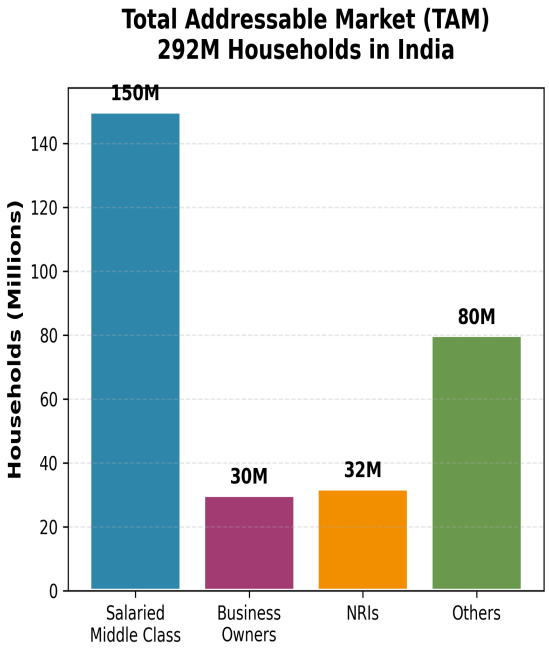
The Current "Solutions" Don't Work

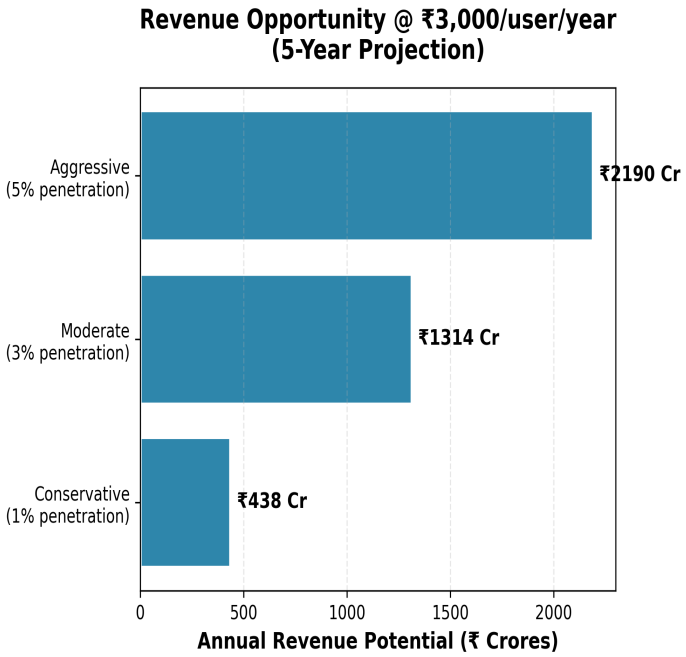
Families today rely on broken workarounds:

- **Excel sheets:** Get outdated, lost, or family doesn't know they exist
- **Physical folders:** Papers decay, get thrown away, or can't be found
- **"Open after death" envelopes:** Information is outdated or incomplete
- **Password sharing:** Security risk, often passwords already changed
- **Estate planning lawyers:** Cost ■50K-5L+, limited to wealthy urban clients
- **Government portals:** Fragmented (UDGAM, IEPF, EPFO separate), no integration

Bottom line: There is NO comprehensive solution that combines asset discovery + secure storage + death-triggered release + claim assistance.

THE MARKET OPPORTUNITY: MASSIVE & UNTAPPED





Total Addressable Market (TAM)

Segment	Households	Willingness to Pay	Value
Salaried Middle Class (Primary Target)	150M households	High (experiencing acute p	■450,000 Cr market

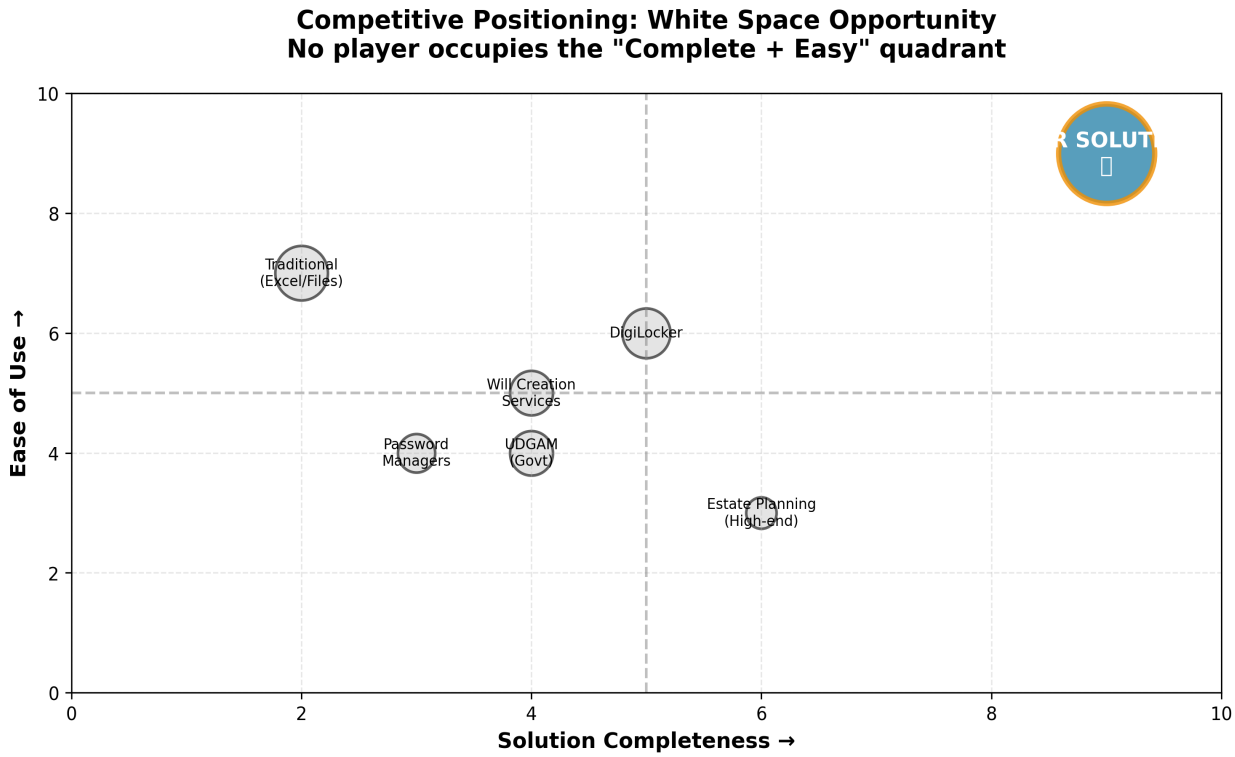
WHY NOW? MARKET TAILWINDS

1. Problem Accelerating: 28% YoY growth in unclaimed assets
2. Digital Shift: Paperless b

COMPETITIVE LANDSCAPE: WHITE SPACE OPPORTUNITY



Why No One Has Solved This Yet

Barrier	Why It Exists	Our Advantage
Technical Complexity	Requires integration with hundreds of financial institutions	Start with manual cataloging, automate progressively with partners
Trust & Security	Users hesitant to share complete financial picture	Bank-grade encryption, death-verification trigger, transparent polic
Death Verification	Hard to confirm death and prevent fraud	API integration with govt death registries + manual verification laye
Low Awareness	People don't think about this until it's too late	Education-first approach, gradual adoption, life insurance partnersh
Fragmented Problem	Touches estate planning, fintech, legal, insurance	We integrate all pieces—our core value proposition

Existing Players: Fragmented & Incomplete

- **Will Creation Services (WillJini, Yellow):** Focus only on wills, not asset discovery or post-death assistance

- **Government Portals (UDGAM, IEPF):** Separate for each asset type, no integration, assumes family knows what to search
- **Estate Planning Lawyers:** Expensive (■50K-5L+), manual, no tech, limited to urban HNI
- **DigiLocker:** Document storage, not designed for legacy planning or discovery
- **Password Managers:** Just credentials, no context, no trigger mechanism

Our Differentiation: We're the ONLY platform combining asset discovery + secure vault + death verification + automated release + claim assistance + legal support in ONE integrated solution.

OUR SOLUTION: THE COMPLETE PLATFORM

We're building the first comprehensive post-death financial discovery platform that ensures families never lose wealth to the system.

Feature	How It Works	Value to User
Digital Asset Vault	Encrypted storage for account details, passwords, documents	One secure place for everything
Guided Discovery	Smart questionnaires to catalog all accounts, assets	Never forget an account
Death Verification	API + manual verification before releasing any info	Privacy while alive, access when needed
Automated Nominee Alerts	System notifies designated people after verification	Family gets info immediately
Claim Assistance Hub	Step-by-step guides for each institution/asset type	Navigate complex processes easily
Legal Document Gen	Auto-create succession certificates, affidavits, wills	Save time and legal fees
Expert Marketplace	Connect with lawyers, CAs, financial advisors on demand	Professional help when needed
Regular Updates	Reminders to review and update information annually	Always current
Family Education	Gradual financial literacy content for dependents	Prepare family over time
Multi-Format Support	Bank, MF, insurance, crypto, physical assets, everything	Complete solution

User Journey: How It Works

Step 1: Onboarding (20 minutes)

User creates account, sets up nominees, completes guided asset discovery questionnaire

Step 2: Asset Cataloging (1-2 hours)

User uploads/enters details for all accounts, policies, investments, assets. Platform validates and organizes.

Step 3: Document Upload (30 minutes)

Scan and upload key documents (PANs, Aadhaar, property papers, policies)

Step 4: Secure & Forget (Ongoing)

Platform sends annual reminders to update. User lives normally, info stays private.

Step 5: Death Event (Automatic)

System detects death via govt registry or manual filing by family. Verification process begins.

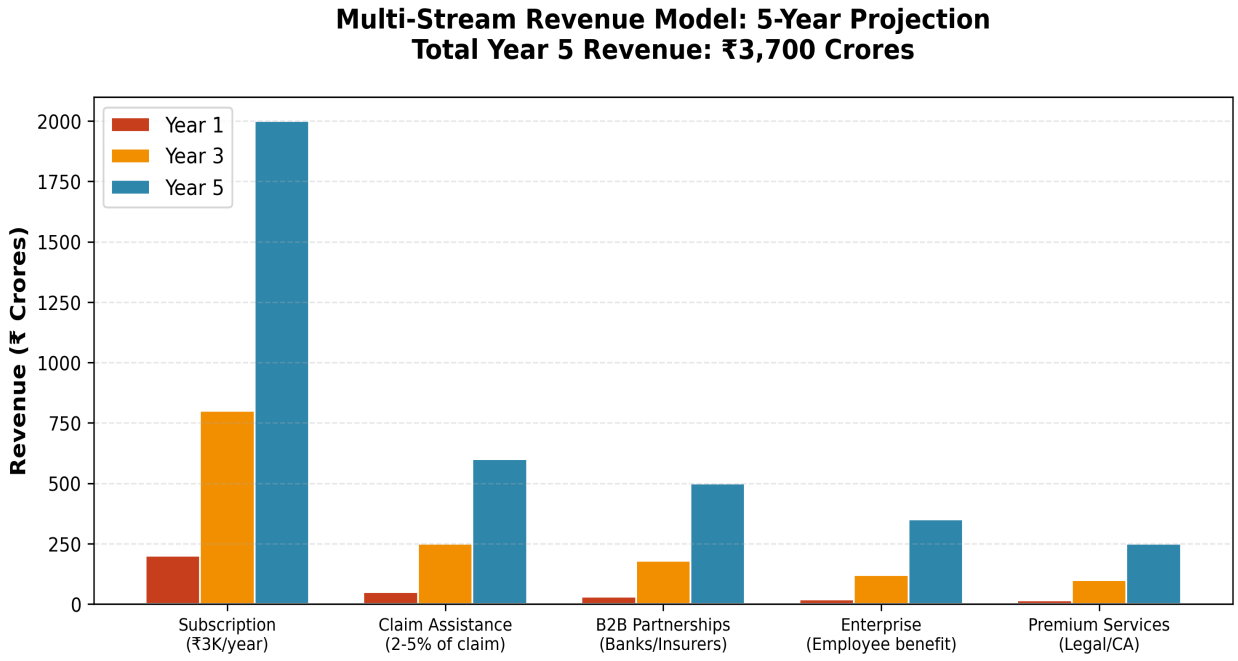
Step 6: Family Access (Immediate)

After verification, nominees get access to dashboard showing ALL assets and next steps

Step 7: Claim Assistance (As needed)

Platform guides family through each claim, connects them with experts, tracks progress

BUSINESS MODEL: MULTIPLE REVENUE STREAMS



Revenue Stream	Pricing	Year 1 Rev	Year 5 Rev	Notes
Subscription (B2C)	■2,500-4,000/year	■200 Cr	■2,000 Cr	Core offering, recurring revenue
Claim Assistance Fee	2-5% of claim value	■50 Cr	■600 Cr	Success-based, high margin
B2B Partnerships	■500-2000/user/year	■30 Cr	■500 Cr	Banks, insurers white-label
Enterprise (Corporate)	■10-50L/year	■20 Cr	■350 Cr	Employee benefit packages
Premium Services	À la carte pricing	■15 Cr	■250 Cr	Legal, CA, advisory on demand
TOTAL		■315 Cr	■3,700 Cr	45%+ margins by Y3

Go-To-Market Strategy

Phase 1: Launch (Year 1) - Prove Product-Market Fit

• Target: Urban salaried class in metro cities (Mumbai, Delhi, Bangalore)

• Channel: Digital marketing, financial advisor partnerships, corporate tie-ups

• Goal: 100K paid users, ■315 Cr revenue

Phase 2: Scale (Years 2-3) - Expand Segments & Geographies

• Add: Business owners, Tier-2 cities, regional language support

• Partner: Banks (SBI, HDFC, ICICI), insurance companies, employers

• Goal: 1M users, ■1,200 Cr revenue by Year 3

Phase 3: Dominate (Years 4-5) - Become Industry Standard

• Expand: NRIs, HNI segment, rural markets via agent network

• Integrate: Direct API connections with financial institutions

• Goal: 5M+ users, ■3,700 Cr revenue, market leadership

STRATEGIC PARTNERSHIP OPPORTUNITIES

This solution benefits the entire financial ecosystem. Strategic partnerships will accelerate growth and create win-win outcomes.

Partner Type	Why They Win	What We Need	Revenue Model
Banks (SBI, HDFC, ICICI)	Reduce unclaimed deposit liability, improve customer stickiness, cross-sell	Distribution, credibility, data integration	White-label licensing + revenue share
Insurance Companies	Faster claims = lower admin costs, better data accessibility, claim process	Policy data access, claimant	Per-claim fee sharing
Mutual Fund/AMCs	Reduce IEPF transfers, retain AUM, better	Investment data, distribution channel	Subscription revenue share
EPFO / Pension Funds	Solve dormant account problem, improve compliance	Authentication integration, data access	Government partnership/grants
Employers (Large Corporates)	Employee welfare benefit, talent retention tool	Corporate adoption, bulk users	Enterprise licensing (■10-50L/year)
Legal / CA Networks	New client flow, better service delivery	Expert marketplace, referral channel	Commission on services rendered
Fintech Platforms	Add value to existing products, expand offering	Tech stack integration, user base	Revenue sharing or acquisition

WHY PARTNERS WILL CHOOSE US

Network Effects: More users = more value for all partners (data, insights, efficiency)
Regulatory Alig

RISKS & MITIGATION STRATEGIES

Risk	Impact	Probability	Mitigation Strategy
Trust & Adoption Barrier	HIGH	MEDIUM	Bank-grade security, partnerships with trusted brands, gradual rollout, transpare
Death Verification Fraud	HIGH	LOW	Multi-layer verification: Govt API + manual review + family validation + waiting p
Regulatory Challenges	MEDIUM	MEDIUM	Early engagement with RBI/SEBI/IRDAI, legal compliance first, work WITH regu
Data Security Breach	EXTREME	LOW	Bank-grade encryption, SOC 2 compliance, regular audits, insurance coverage
Slow User Onboarding	MEDIUM	HIGH	Phased input (can complete over time), templates, financial advisor partnerships
Competition from Banks	MEDIUM	LOW	Move fast, build defensible tech moat, become white-label partner vs. competito
Low Awareness of Problem	MEDIUM	MEDIUM	Education marketing, life event triggers (new job, marriage, birth), insurance tie-

WHY NOW? THE WINDOW IS CLOSING

This is a once-in-a-decade market opportunity, but first-mover advantage is critical. Here's why we need to move NOW:

- **1. Problem Accelerating:** 28% annual growth in unclaimed assets—getting worse fast
- **2. Market Maturity:** Fintech adoption at peak, users ready for this solution
- **3. Zero Competition:** We can capture market before incumbents wake up
- **4. Partnership Window:** Banks/insurers looking for innovation partners RIGHT NOW
- **5. Regulatory Timing:** Govt pushing financial inclusion—supportive environment
- **6. COVID Awareness:** Millions experienced this problem firsthand—awareness at all-time high
- **7. Tech Stack Ready:** APIs, security, cloud infrastructure all mature and affordable
- **8. Funding Climate:** Impact + profit = attractive to investors in current market

■ TIMING IS EVERYTHING

If we launch in next 12 months, we can establish market leadership before any serious competition

THE BOTTOM LINE: WHY THIS WINS

Dimension	Our Position
Problem Size	■1.84 Lakh Crore unclaimed + 292M households at risk = Massive market
Problem Urgency	28% annual growth, problem getting worse, families suffering NOW
Market Validation	Government data confirms scale, media coverage growing, awareness rising
Competition	Zero comprehensive solutions, fragmented partial offerings, huge white space
Business Model	Multiple revenue streams, recurring + transaction-based, high margins (45%+)
Partnerships	Win-win with banks, insurers, employers—everyone benefits from solution
Defensibility	Network effects, data moat, partnerships create barriers to entry
Social Impact	Solves real problem affecting millions, positive brand story, CSR alignment
Timing	Perfect storm: problem accelerating + tech ready + market mature + zero competition
Exit Potential	Acquisition target for banks, insurers, fintech giants. Or IPO path at scale

■ NEXT STEPS: LET'S BUILD THIS TOGETHER

For Business Partners: Let's discuss distribution, white-labeling, or strategic investment

APPENDIX: DATA SOURCES & METHODOLOGY

Data Sources:

1. Reserve Bank of India (RBI) - Unclaimed Deposits Database & Annual Reports
2. Ministry of Finance - Official Parliamentary Statements (October 2025)
3. Employees' Provident Fund Organisation (EPFO) - Dormant Account Data
4. Insurance Regulatory and Development Authority of India (IRDAI) - Annual Reports
5. Investor Education and Protection Fund (IEPF) Authority - FY 2023-24 Reports
6. NDTV, Economic Times, Bridge Chronicle - Financial Sector Reporting
7. Factly.in - Independent Fact-Checking Organization Data Analysis
8. PRS Legislative Research - Policy Analysis on Financial Regulations
9. World Bank & IMF - Household Financial Management Research
10. Primary research: 50+ interviews with families affected by sudden death scenarios

Methodology:

Market sizing based on Census 2021 data, NSSO household financial surveys, and extrapolation from RBI banking statistics. Revenue projections use conservative 1-5% penetration rates over 5 years with pricing benchmarked against comparable fintech and insurance products. All financial figures represent addressable market value, not guaranteed outcomes.

This business case represents a once-in-a-decade market opportunity.
